

**AMENDMENTS TO THE CLAIMS**

**1. (Currently Amended)** A color interlayer film for laminated glass, comprising a resin composition containing a polyvinyl acetal resin, a coloring agent, ~~and~~ an infrared ray shielding agent, ~~and a plasticizer~~ characterized in that the resin composition further contains a ~~non-~~ surfactant phosphoric acid ester compound selected from the group consisting of a trialkyl phosphate, a trialkoxyalkyl phosphate, a triaryl phosphate and an alkyl aryl phosphate at a ratio of 5 parts by weight or less to 100 parts by weight of the polyvinyl acetal resin, wherein the plasticizer is triethylene glycol di-2-ethylhexanoate and the amount of the plasticizer is 20 to 70 parts by weight to 100 parts by weight of the polyvinyl acetal resin, and the phosphoric acid ester compound is at least one selected from the group consisting of trioctyl phosphate, triisopropyl phosphate, tributoxyethyl phosphate, tricresyl phosphate and isodecylphenyl phosphate.

**2-3. (Cancelled)**

**4. (Currently Amended)** The color interlayer film for laminated glass according to claim 1, wherein the content of the ~~non-surfactant~~ phosphoric acid ester compound is 0.001 to 5 parts by weight to 100 parts by weight of the polyvinyl acetal resin.

**5. (Previously Presented)** A laminated glass, characterized in that the color interlayer film for laminated glass according to claim 1 intervenes between at least one pair of glass plates.

**6-9. (Cancelled)**

**10. (Previously Presented)** A laminated glass, characterized in that the color interlayer film for laminated glass according to claim 4 intervenes between at least one pair of glass plates.
